*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 23-33, drawn to an LCD with a capacitor (class 349 subclass 39).
  - II. Claims 6-22, drawn to an LCD which a multilayer electrode structure (class 349 subclass 147-148).

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). The subcombination can be employed in devices without capacitors, and the combination can be made with a single layer conductor.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the substantial non-overlapping searches, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the substantial non-overlapping searches, restriction for examination purposes as indicated is proper.

Please note that these claims as amended need to be researched, and further applicant's assertion that the examiner has not applied the art correctly has highlighted the need to search again. The issues between the two groups are substantially non-overlapping, and the difficulty in tracing out all the layer structure in reading the claims and the references makes the burden considerable.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Parker whose telephone number is (703) 305-6202. The fax phone number for this Group is (703) 308-7726. Any inquiry of a general nature or relating to the status
